

**Do you have TB infection or disease?  
Get well before you get sick with TB.**

**Are you at risk for TB?**

- ☐ Were you born in in a county with a lot of TB?  
(not in U.S., Canada, Australia, New Zealand, or  
Western or Northern Europe).\*
- ☐ Do you have another disease or condition like  
HIV infection, organ transplant, or diabetes?
- ☐ Have you had contact with someone with active  
TB disease any time in your life?

**If you have a risk for TB, know your TB status. Ask your health care provider for a TB test. If your TB test is positive and TB disease is ruled out, treating TB Infection is recommended, so you will not develop TB disease. Keep your family safe.**

**\* In this group a TB blood test is preferred.**

**TB risk assessments can be found on the  
FOR PROVIDERS page of [www.ctca.org](http://www.ctca.org)**
