

Webinar: The Tuberculosis epidemic, its impact in California and how we end TB in California

Date: April 8, 2021

Time: 12:00 pm – 1:00 pm

Registration Link:

https://zoom.us/meeting/register/tJUkcuCgpjgqHdQYqUbRoKcXN24s_qEuC4ls

Please join the California TB Controllers Association and the Association of Asian Pacific Community Health Organizations for a World TB Day/Public Health Awareness Week webinar highlighting the impact of the tuberculosis (TB) epidemic in California.

Learn how many Californians were diagnosed with TB disease in 2020, the communities it disproportionately impacts, and what community organizations and local public health departments are doing to protect communities from TB. We will also discuss plans to expand the Coalition for a TB Free California and ask for your feedback on the coalition's activities and priorities.

Confirmed Speakers:

Jackie Cuen

TB Survivor, Advocate and Peer Support Navigator

Pennan Barry, MD, MPH

Chief, Surveillance and Epidemiology Section, Tuberculosis Control Branch
Division of Communicable Disease Control, Center for Infectious Diseases
California Department of Public Health

Joe Lee

Director of Strategic Initiatives and Partnerships
Association of Asian and Pacific Community Health Organizations

Every year, on 24 March, the Stop TB Partnership and its partners unite to raise public awareness of the devastating health, social, and economic impacts of TB and call for an end to this epidemic. World TB Day is a chance for us to urge global leaders to make up for lost time, meet the UN TB commitments by 2022, and finally end TB by 2030.

THE CLOCK IS TICKING!

Around the world, TB kills close to 4,000 people every day, among them 700 children. That means that 3 people die from TB every minute! - Stop TB Partnership
